

PH 9.0 Phono Stage

ModWright Instruments, Inc.

FOLLOWING IN THE FOOTSEPS

...of the Reference PH 150, the PH 9.0 offers much of the same performance and flexibility of the PH 150 at a lower price and smaller form factor.

The PH 9.0 is ideal for reference systems or secondary audiophile systems. Optimized by designer/owner Dan Wright to provide the most natural and musical presentation of analog playback.

Extensive testing with both MM and MC cartridges and a series of reference turntables and tone arms proved the performance of this new design.

The PH 9.0 uses the same (2) 6C45 and (2) 6922 tube complement and embodies the same tonality, soundstage and musical presentation of the reference line.

Like all MWI products, proudly designed and Hand Crafted in the U.S.A.

FEATURES & TUBES

- On the fly MC loading. Adjustable Gain. Faraday shielded enclosure.
- Inputs: MM & MC.
- Stereo/Mono: Rear Toggle.
- Front Panel Controls: power, gain, input select, MC loading.
- Power Supply: External, Solid State.
- Power Umbilical: 4-pin XLR, 6 ft.
- Tube Complement: (2) 6C45, (2) 6922/6dj8/7308).
- Offered in black and silver finish (ext. supply black only).
- Optional fully balanced outputs (add cost option).

TECHNICAL SPECS

- MC Gain:** 64dB (58dB, 52dB)
- MM Gain:** 52dB (46dB, 40dB)
- Gain Adjust:** 0, -6dB, -12dB
- MC Loading:** 10-20-50-100-250-470
- MM Loading:** 47K fixed.
- Frequency:** 20Hz – 50Khz (+/- .2dB)
- PH9.0 Phono Weight/Dim** - 14 lbs.
10-1/4"W x 10-1/4"D x 4-1/4"H
- Power Supply Weight/Dim** - 13 lbs.
7-1/4"W x 9-1/4"D x 3-3/4"H
