

## OPPO TUBE MOD WITH EXTERNAL POWER SUPPLY INFORMATION SHEET

1. How do you hook up the Oppo and external power supply?

**Plug a power cord into both the Oppo player and the external power supply. Connect the XLR terminated umbilical between player and power supply.**

2. What sequence do you turn on each unit and what should you expect?

**First, turn on external PS 9.0 and then the Oppo player. There should be approximately a 45 second delay, where the external power supply is warming up the tubes.**

3. What tubes are included with the Oppo and external power supply? What is their longevity?

**The Oppo has (2) new production JJ Electronic 6922 driver tubes. Driver tubes should last 6000 hours+.**

**The external PS 9.0 has (1) 5AR4 or equivalent 5U4-GB rectifier tube. Rectifier should last 10000 hours +.**

4. Is there any other important information regarding the operation of the Oppo and external power supply?

**Power supply powers tube stage only and may be turned off when not in use, while player may remain on if desired.**
